International Taxation - Principles and Mechanisms

General Objectives:

The growing internationalization of companies and financial exchanges require that the tax dimension be taken into account when developing or carrying out an international operation. The aim of this course is to provide participants with the knowledge and skills that will enable them to get to grips with company taxation at international level and to become aware of the main tax problems and constraints encountered by companies outside our country.

Specific objectives:

At the end of the course participants will be able to:

- Master the fundamentals of international taxation;
- Determine how benefits are taxed;
- Know how to combat tax evasion;
- Master the taxation of dividends;
- Define international operations and VAT.

Recipients:

This course is essentially aimed at accounting and tax managers who wish to better integrate the international tax dimension into their decisions, but also at all other professionals involved in and with responsibility for international tax operations.

Duration:

18 Hours
